WORK HISTORY

Junior Web Developer at CieloCosta United Kingdom (Remote)

July 2022 - Juin 2023 (MERN - GraphQL - MongoDB)

- Contributed moving a web application to production when just joined.
- Developed cross-platform accessibility with modern CSS for a mobile-responsive user experience on any device, prioritizing browser compatibility.
- Built an API following GraphQL standards allowing admins to fetch and manipulate data in MongoDB.
- Developed PowerApps and automated flows, utilizing SharePoint lists to streamline and enhance company's daily operational activities.

Web Developer at Automatika France (Remote)

May 2022 - July 2022 (Flask - React - REST API - MySQL)

- Developed VPAY, an innovative payment gateway integrating cutting-edge face recognition technology. The platform offers a user-friendly interface and a seamless step-by-step process for both online and in-person payments, leveraging advanced AI capabilities for enhanced security and convenience.

Freelancer Tunisia (Remote)

August 2021 - October 2021 (Freelancer Platform)

- Successfully resolved bugs in a shopping-oriented web application through adept utilization of diverse technologies.

June 2021 - July 2021 (Consulting for students)

- Facilitated the timely development of students' final projects, ensuring successful outcomes and prompt delivery.

Full stack intern at ESPADA Hammamet

July 2021 - August 2021 (Laravel, Javascript)

- Undertook the mission to create the OPIUM platform, a web application developed using Laravel as the main technology. Successfully delivered the project with dedication and hard work.
